

NutriSage AI Reference Guideline - SDG 3.4 Good Health

Plant-based protein options in Indian diet: Moong Dal, Paneer, Tofu, Chickpeas, Lentils, Sprouts. These plant proteins are essential for maintaining muscle mass in a vegetarian diet.

Cardiovascular health: Increase daily dietary fiber to 30g/day, reduce trans-fats.

Dietary fiber helps in lower cholesterol levels and supports heart health.

Type-2 diabetes prevention: Consume Oats, Bajra, Ragi, and low glycemic index foods.

Whole grains regulate blood glucose levels and insulin sensitivity.
